

ADVOCACY SUPPORT EXPERTISE

Sexual Assault Services Victoria (formerly CASA Forum) is the newly expanded peak body for sexual assault and harmful sexual behaviour services in Victoria.

For over 35 years our members have provided a range of sexual assault counselling, crisis and support services to adults, young people and children who have experienced sexual assault and their family members; and children and young people presenting with harmful sexual behaviours.

All Victorian government funded sexual assault services have joined forces to help shape trauma informed, person centred and best practice responses to sexual assault. Our combined expertise will continue to inform our advocacy with government and other stakeholders in driving sexual assault prevention, response, policy development and investment.

We aim for a world free of sexual violence.
